Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Weston, et al.-5497944.

Weston discloses s device in fig. 1 having a container 10, a valve body 1, a piston 3, a metering chamber 4, valves 23,25 and 13, biasing spring 6 and outlet 40. In use, the handle 31 of the piston 3 is manually withdrawn against the biasing of the spring to draw a metered amount of fluid from the container into the metering chamber by suction. The handle is then let go causing the spring to bias the piston to dispense the metered fluid out of the outlet in the form of atomized droplets. The size of the metering chamber is about 20 microliters as seen in col. 10 lines 2-3.

Allowable Subject Matter

Claims 1,3-13,15,16 and 31-33 are allowed.

Claims 21-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 17 and 30 have been considered but are moot in view of the new ground(s) of rejection.
